

Jaypee launches new Bar Cutting Machine

To meet the needs of Construction Equipment market, Jaypee has recently launched its new model C 28 c Bar Cutting Machines.

This innovative machine is a smart thing, equipped with a small, 3 HP Electric Motor, and the Single Phase power input which makes it useful everywhere even in places with no access to 3 phase connection.

The maximum diameter of reinforcing bar which can be transformed by this model is 28 mm and can cut at the same time three rebars with maximum diameter of 8 mm.

C 28 from JAYMAC®, Jaypee's registered brand, is a work force which can be used without break, for a round-the-clock operation.

This small but powerful Bar Cutter shears steel rods amazingly fast to ensure that your steel yard is used efficiently.
