

Jaypee Showcasing Best Rebar Processing Equipments at bC India 2011

Jaypee India is all set to showcase the new age of advanced and innovative technology with Jaymac range of bar bending and bar cutting machines at bC India 2011 (stall No B-19) where visitors will have great opportunity to experience the best machines of the industry during the show.

On display will be Radius Bending Machine with radius up to 35mm rebar. This machine can form radius without pre-bending bars, it comes with a standard 2-speed drive motor. Adhering to most safety requirements, it is an efficient and quicker bender used for making circular rings.

In addition, another show piece would be Jaymac Bar Shearing Machine, which is also known as Bar Cutting Machine robustly built to withstand stress while shearing of rebar and various forms steel

bars. Durable, fast and easy to use, this machine gives a one-shot cutting operation with perfect cutting accuracy thus minimizing the use of labor and long drawn cutting process for single cuts. This workhorse knows no stop as it can be effectively put to use for a constant round-the-clock production.

Apart from this, other products on display would be Jaymac Bar Bending Machine which is a semi-automatic, durable, fast and cost effective largely used for bending reinforcement bars and various forms of round bars. This machine effectively increases the production capacity of your steel yard, minimizing the use of manual labor. The automatic angle selection permits a precise bend at the preset angle making it one step bending process for various forms of bends and stirrups. Bar Bending

Machine is easy to use and can be operated by a layman with nominal experience.

In yet another offering, the company is displaying an Automatic Stirrup Benders that reduces labor, lessen scrap, and increases production with KRB Auto Stirrup Benders. Its line has been redesigned to offer the market a solid, cost effective alternative. Rugged American manufacturing and improved design has given KRB a reliable line of performers in the field.
